

CONQUER THE SKIES

SECOND-GENERATION FPV OPTICAL FIBER REEL LAUNCHED

5KM/10KM/20KM/30KM

/ EXPERIMENT

We conducted comprehensive tests under different scenarios, covering aspects such as rapid ascent, rapid dive, forest-circling, mid-air hovering, high-speed flight, low-speed flight, and intermittent flight!

/ FAILURE

We went through five months of non-stop failures, yet we never lost heart—instead, we conducted experiments and made improvements over and over again.

/ IMPROVE

Finally, our data is accurate to a decimillimeter. We adopt a nationwide exclusive taper design, enabling the product to fly several kilometers as long as the optical fiber can extend that distance.

/ ACHIEVEMENT

Our product can still maintain high-speed flight over the final 2 kilometers of the optical fiber. This is also one of the performance aspects that no one in the market dares to put to the test!

NEW AND UNIQUE DESIGN
BREAKING TRADITIONAL VISUAL BOUNDARIES

Appearance and texture are both online, making one's heart race at a glance.
Aesthetics infused with details, every side looks good

DUAL STRONG FIXATION, **STABLE AND NOT LOOSE**

4 screws + 4 bottom clamping seams are used for double fixation, providing a sturdy structure that is less likely to shift or fall off during use.

EXCLUSIVE RESEARCH AND DEVELOPMENT OF WINDING SHAFT.

With exclusive design that tackles key user pains, it delivers a reliable experience for the final 1-3 kilometers.

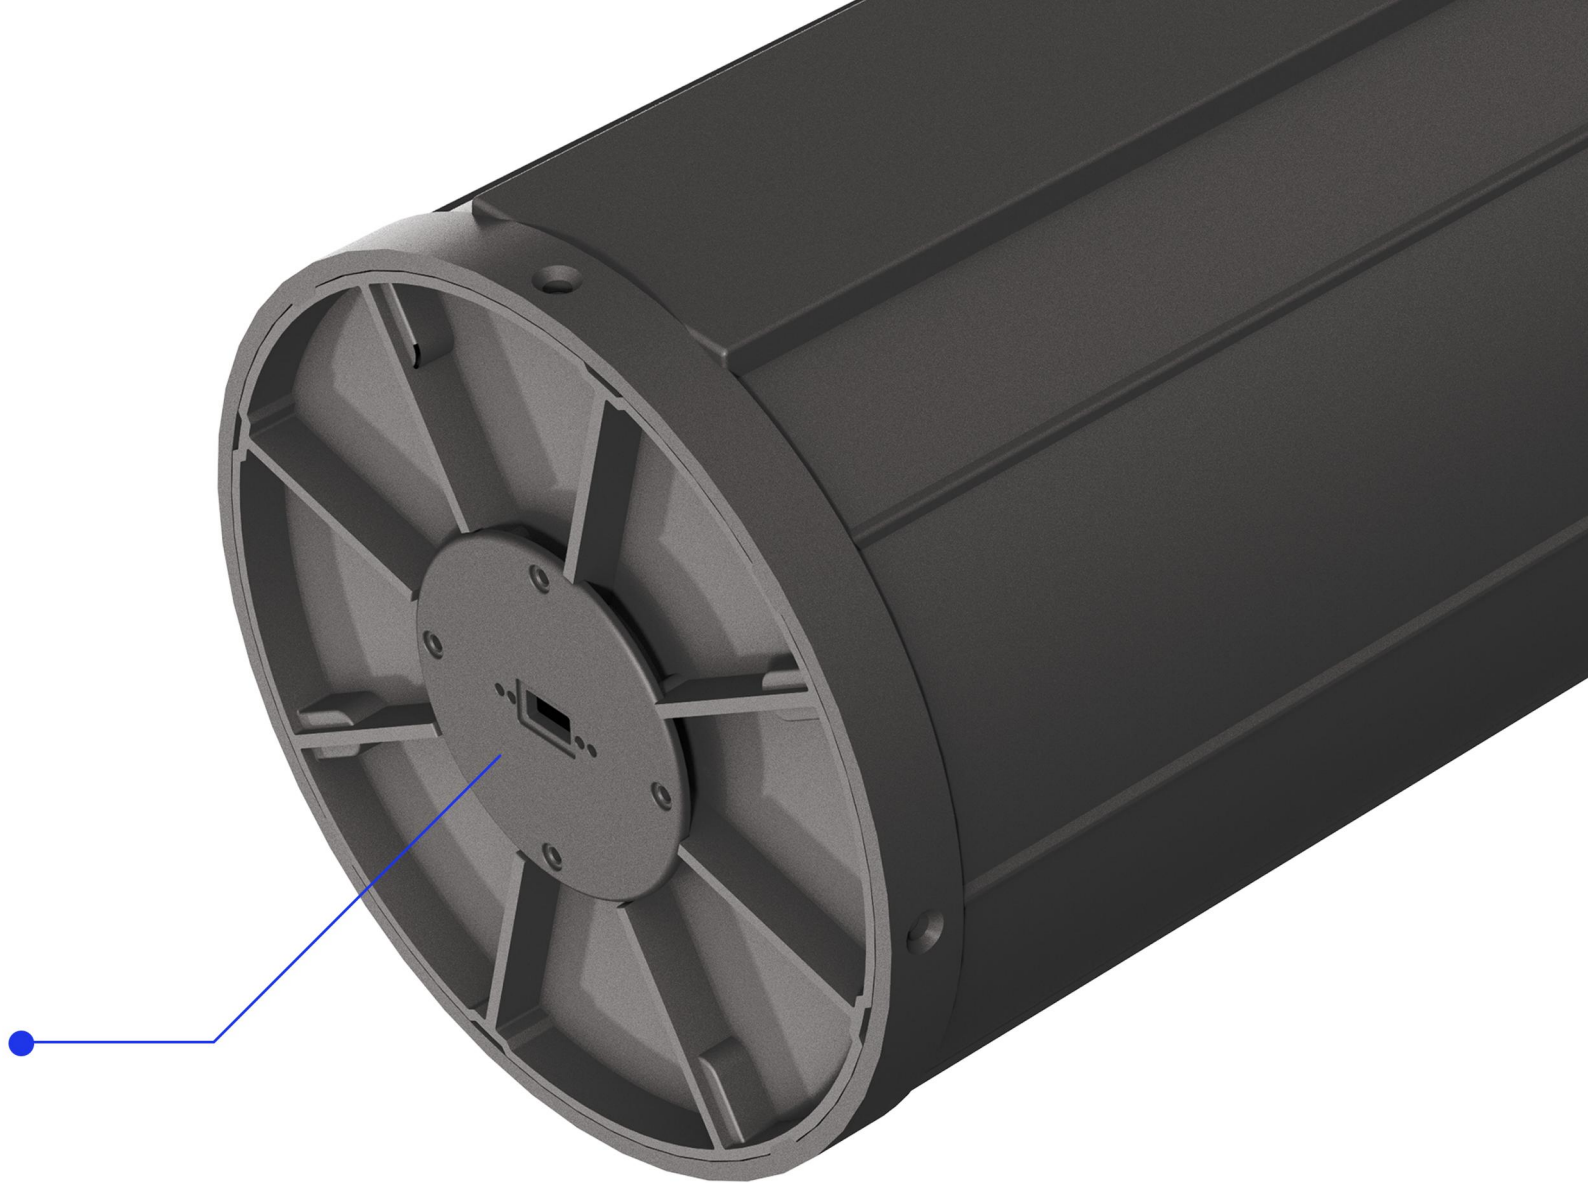

CURVED ALUMINUM ALLOY OUTLET SPOUT TO **PREVENT DRONE BLADE ENTANGLEMENT**

Curved aluminum alloy outlet spout design, which accurately avoids drone blades, effectively protects fiber optic cables, and prevents entanglement and damage.
